

AG273QX

27 inch (68.6 cm) LCD MONITOR

Smooth, impressive QHD images with FreeSync 2 HDR, eSports-ready speed with 165 Hz and 1 ms

AMD FreeSync 2 HDR

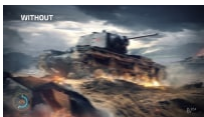

AMD's FreeSync 2 improves upon its predecessor FreeSync, keeping the support for variable refresh rate synced with the GPU's framerate, but also including gaming-specific HDR (High Dynamic Range) support, which reduces the input lag versus conventional HDR monitors. Stricter requirements and enforcement of Low Frame Compensation (LFC) technology will ensure smooth, latency-, stutter- and tear-free gaming, now with a higher dynamic range.

VESA DisplayHDR 400

The first tier in the VESA certification for High Dynamic Range, the DisplayHDR400 specifies true 8-bit image quality, global dimming, peak luminance of 400 cd/m², lower black levels, higher contrast and higher colour gamut coverage. Experience mind-boggling vibrant and even more immersive gaming thanks to DisplayHDR400!

165Hz

A 165Hz refresh rate, well over twice the industry standard of 60Hz, makes games run smooth as silk. Realize the potential in your graphics card. Forget screen tearing and forget motion blur. Feel your reflexes become one with the action. Never look back.
