

INTERNET SOLUTIONS RESELLER VERSION

MODELS

ProLiant 1600

ProLiant 1850R

ProLiant 6500

Compaq ProLiant Web Servers are delivered on specific configurations of these servers.

Overview

Compaq is providing its Authorized Resellers with tested and recommended configurations and part numbers for several Compaq ProLiant Web Servers.

Compaq is marketing its ProLiant Web Servers to customers as fully integrated Web hosting solutions. Compaq is recommending that customers contact their Compaq Authorized Reseller to determine the configurations most appropriate for their environments. Recommended configurations are being provided only to Compaq Authorized Resellers to enable you to more confidently help your customers plan and deploy their Web environments.

Description

Compaq ProLiant Web Servers are marketed as integrated solutions that enable simple and effective web site hosting. Compaq ProLiant Web Servers include leading industry-standard software that has been tested for Web applications.

Three server platforms are recommended to meet the needs of enterprise customers and Internet Service Providers (ISPs). These servers include the ProLiant 1600, 1850R, and 6500:

- Providing unmatched uptime features for its class, the ProLiant 1600 Web Server is ideally suited for use as a departmental/workgroup Internet/intranet server for workgroup and remote-office web applications.
- Rack-mountable with a 3U-form factor, the ProLiant 1850R Web Server is ideally suited for use as a dedicated Internet/intranet server in high-density data center environments found at corporations and ISPs.
- The ProLiant 6500 Web Server provides a high-capacity, hot plug storage, expansion of up to four processors and expansion of up to 4 GB of memory. This provides enterprise customers with the latest high availability and scalability options as their business needs grow.

STANDARD CONFIGURATIONS

- Compaq ProLiant server
- Microsoft Windows NT Server
- Microsoft Internet Information Server (IIS)
- Microsoft Site Server
- Compaq Insight Management (CIM)

Convenient Set Up and Confident Deployment

Compaq ProLiant Web Servers incorporate leading industry-standard Internet software, including Microsoft Internet Information Server (IIS) and Microsoft Site Server. Compaq ProLiant Web Server configurations have been tested to enable the reliable and consistent performance of the server hardware, operating system, Web server software and Web application software.

Microsoft Windows NT Server and Internet Information Server

Microsoft Windows NT Server with IIS is the easiest way to publish information and bring business applications to the Web. IIS is designed to meet the needs for a wide range of users, from workgroups and departments on a corporate intranet, to Internet Service Providers (ISP) hosting web sites that receive millions of hits per day. IIS makes it easy to share information, build and deploy business applications, and host and manage sites.

Microsoft Site Server

Microsoft Site Server is a comprehensive website environment for enhancing, deploying and managing sites utilizing Windows NT Server and IIS. Microsoft Site Server includes tools for content creation, publishing, personalization, site management and usage analysis.

Built-in Management

All Compaq servers feature Compaq Insight Manager, a comprehensive management tool that facilitates greater application availability by monitoring the operation of Compaq servers and proactively notifying administrators of impending hardware failures. Compaq Insight Manager gives administrators real control through its intuitive visual interface, comprehensive fault and configuration management and industry-leading remote management. The ProLiant Web Servers also include the Integrated Remote Console, which allows out-of-band management capabilities such as remote console and remote reset, independent of the state of the network operating system.

SERVICE AND SUPPORT

Compaq Services provides a wide range of service offerings, including a three-year limited warranty¹ fully supported by a worldwide network of resellers and service providers, lifetime toll-free 7 x 24 hardware technical phone support, Pre-Failure Warranty coverage of hard drives, memory and Intel Pentium® Pro and Intel Pentium II processors and Compaq Service and Support Programs are available on a worldwide basis. Compaq does not provide software installation and support. Compaq Authorized Resellers should contact the software manufacturer for additional support.

HOW TO PURCHASE

Compaq products can be purchased through your existing Compaq Authorized Channel. Third party software products should be purchased through your existing method of procurement. For more information on Compaq Internet solutions, visit www.compaq.com/internet, www.compaq.com/activeanswers, and www.compaq.com/clubweb.
