Microsoft® Natural® Ergonomic Keyboard 4000

Advanced Ergonomic Design

Make the move to superior comfort with this breakthrough keyboard design

Place your hands and arms naturally and comfortably with the Microsoft® Natural® Ergonomic Keyboard 4000. The improved split design encourages a more natural hand, wrist, and forearm position and its new curved key layout makes keys easier to reach. The Zoom Slider lets you zoom in for close-ups of Web pages, images, and more – with just the touch of a finger. And 5 customizable “My Favorites” keys give you instant access to the folders, files, and Web pages you use most.

Gullwing Design

- Natural arc mimics the curved placement of the fingertips to reduce key reach
- 14-degree gable reduces wrist pronation
- Curved key bed designed to provide more direct key strikes for less finger effort

Microsoft's Natural® Split Keyboard Design

12-degree angle split for natural wrist alignment

Reverse Slope

The optional palm lift creates a 7-degree reverse slope for a more natural wrist posture than flat keyboards

Shown with 7-degree reverse slope attachment

System Requirements
